【GBP/SCOPE/IGESS】How to Use Online Databases of the Library by VPN Connection

All HOSEI students can access to the Hosei University Library online databases from their home internet access by VPN connection.
https://opac.lib.hosei.ac.jp/opac/myopac/gateway/?lang=1

"AnyConnect SSL-VPN" software application is needed to use VPN connection.
To install the software application, please follow the instructions below:

<Download and install of "AnyConnect SSL-VPN">
Windows 10 users:
Access to https://vpn.hosei.ac.jp/anyconnect then log in with your HOSEI ID and password.
Click the "AnyConnect" in the left menu then click "Start AnyConnect" button in the middle.

iOS users:
Open the App Store and then search for "AnyConnect". Then download the "Cisco AnyConnect".

Android users:
Open the Play Store and then search for "AnyConnect". Download the "AnyConnect".

For your reference, the install manuals for VPN connection in Japanese are available from the website. Unfortunately, there are no English manuals at this moment, however, it may help you since there are many pictures on it.
Students can download those manuals from the following web site:
https://netsys.hosei.ac.jp/protected/manual/vpn/manual-vpn.html#manuals
If you have any troubles with installing "AnyConnect SSL-VPN" or VPN connection from home, please consult with the User Support Office (English/Japanese):
net-uketsuke@ml.hosei.ac.jp
*It may take time to reply for a few days.
*Attaching screenshot of your PC/devices will help the staff to understand the errors/troubles.
